DETAILED ACTION

1. This application contains sequence disclosures that are encompassed by the definitions for nucleotide and/or amino acid sequences set forth in 37 CFR 1.821(a)(1) and (a)(2). However, this application fails to comply with the requirements of 37 CFR 1.821 through 1.825 for the reason(s) set forth on the attached Notice To Comply With Requirements For Patent Applications Containing Nucleotide Sequence And/Or Amino Acid Sequence Disclosures.

Applicant must comply with the sequence rules, 37 CFR 1.821 - 1.825 within the statutory period set for response to this office action. Failure to comply with these requirements will result in ABANDONMENT of the application under 37 CFR 1.821(g). Extensions of time may be obtained by filing a petition accompanied by the extension fee under the provisions of 37 CFR 1.136(a). In no case may an applicant extend the period for response beyond the SIX MONTH statutory period. Direct the response to the undersigned. Applicant is requested to return a copy of the attached Notice to Comply with the response.

2. *Election/Restriction*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I, claim(s) 16 and 17 drawn to recombinant polypeptide comprising SEQ ID NO:2 or encoded by SEQ ID NO:1, classified in class 530, subclass 350.

Group II, claim(s) 16-17 drawn to recombinant polypeptide comprising SEQ ID NO:3 or encoded by SEQ ID NO:1, classified in class 530, subclass 350.

Art Unit: 1646

Group III, claim(s) 18-19, drawn to antibody which binds to recombinant polypeptide comprising SEQ ID NO:2 or encoded by SEQ ID NO:1,classified in class 530, subclass 387.9, for example.

5 Group IV, claim(s) 18-19, drawn to antibody which binds to recombinant polypeptide comprising SEQ ID NO:4 or encoded by SEQ ID NO:3, classified in class 530, subclass 387.9, for example.

The inventions are distinct, each from the other because of the following reasons:

The products of Inventions I-IV are distinct because they have distinct functional, chemical and physical properties capable of separate use and manufacture.

10 Because these inventions are distinct for the reasons given above, restriction for examination purposes as indicated is proper. A search of the art for Inventions I-IV would not be co-extensive with each other. Because the searches required for these inventions are not co-extensive an examination of the materially different, patentably distinct inventions in a single application would constitute a serious burden on the examiner.

15 Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently

Art Unit: 1646

amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).
